90 mins

Communities of Practice ~ A small group of people who have worked together over a period of time. Not a team, not a task force, not even an authorized or identified group. People in CoPs can perform the same job or collaborate on a shared task or work together on a product. They are peers in the execution of "real work". What holds them together is a common sense of purpose and a real need to know what each other knows. There are many CoPs within a single company, and most people belong to more than one.
